Alampalli Engineering, PLLC is a forward-thinking consulting firm that delivers innovative solutions across engineering, artificial intelligence, business strategy, and software development. We unite technical rigor, cutting-edge research, and practical implementation to help public agencies and private companies design smarter, more resilient systems. Guided by Dr. Sreenivas Alampalli, CEO and distinguished researcher and practitioner, we unite engineering, AI, and software innovation to empower clients worldwide. As a trusted partner, we provide high-quality, technology-driven solutions that empower clients and shape the future of infrastructure through innovation, expertise, and excellence.
